

Business Re-imagined for the Digital World

Job role: RPA Solution Architect

Location: Offshore location, with extensive travel to UAE & GCC expected

QuantumX is a technology start-up founded in April 2019, currently based out of Abu Dhabi and Dubai, UAE.

Our **Vision** is to help unleash human creativity & innovation by enabling cutting edge automation solutions that will free us from the routine, tedious and boring elements of our jobs.

Our **Mission** is to design and implement transformational intelligent automation solutions, using the latest emerging technologies involving Artificial Intelligence, Robotics Process Automation, Internet of Things and Blockchain.

Our clients engage us to help deliver their digital transformation agenda. In particular, we assist them in selecting processes ripe for automation and design and implement the RPA solutions based on the leading RPA technology platforms and **UiPath** particularly.

What You Will Do

- Conducting business analysis to identify potential for process automation
- Documenting As-Is process across Finance function
- Advising on business process re-engineering opportunities
- Design, build, test and deliver automation solutions using Robotic Process Automation (UiPath mainly), Chat & Artificial Intelligence technology vendor solutions
- Using your skills as a functional expert to configure and deploy tools and applications on the UiPath or other Gardner's magic quadrant RPA platform
- Providing training to client teams on RPA deployment methodology
- Working across a dynamic, international team where English is the common language
- Collaborating with the best and brightest minds in the industry
- Coaching and mentoring junior team members
- Contributing to practice-building efforts such as recruiting, training and attending community events
- Traveling in the Middle East to work with prestigious clients and deliver large-scale transformational change
- Contribute thought leadership to the development and evolution of our Digital Transformation capabilities and intellectual capital including publishing articles, whitepapers, or performing research

What You Will Bring

- Over 7 years of IT experience, minimum 2 years' experience in leading architecture and design
- Minimum bachelor's degree ideally in Computer Science, Maths, Science, or other quantitative discipline with specialization from an accredited college or university

- UiPath certifications: Business Analyst, Infrastructure and Solution Architect certification a must
- Good knowledge of core Finance processes (Record to Report, Purchase to Pay, Order to Cash)
- Good understanding of financial accounting fundamentals, such as the P&L, Balance Sheet and Cash Flow statements
- Sound experience in delivery of process improvement and automation, supplemented by good knowledge of supporting IT tools
- Ideally, experience in successful and demonstrable Proof of Concept and pilots on RPA, productivity enhancement of BOTS and full life cycle implementation experience on one of the leading RPA solutions in the Gartner quadrant
- Experience with RPA tools (UiPath) & with .Net, R, Python, SQL, Java or JavaScript, and application API development is a plus
- Experience with Data Analytics, Cognitive / AI, Machine Learning, Natural Language Processing (NLP) with preference given for industry experience is an advantage
- Experience in process mapping and process analysis would be an additional asset
- Knowledge of process improvement methodology (Lean, Six Sigma) would be an additional asset
- Willingness to learn new RPA tools (Thoughtonomy, BluePrism, etc)

Your Winning Qualities

- Natural leader; easily establishes relationships with clients and colleagues
- Team Player; enjoys the intellectual stimulation of collaborating with colleagues around the world
- Determined; appreciates a challenge and overcoming obstacles to achieve results
- Digitally savvy; continuous learner
- Strong communicator; fluency in English is required, Arabic will be highly advantageous
- Willing to travel and work at international client sites in UAE and the GCC
